un-01-codex\evidence\score.json

Executive score report for deterministic grenade weapon benchmark output.

73/100

FAIL

73 / 100

Total benchmark score

Below passing threshold.

The PDF mirrors the verifier JSON result. Category bars below show which behaviors were observed at runtime and which remain incomplete.

Screenshot visual score

6/10

Auxiliary only - not counted in 100-point score.
debug_arena projectile visible in 6 captured frame(s); debug_arena projectile footprint too small: 36px below 64px minimum; debug_arena explos...

main_scene / attack_070

Category Scores

Category	Score	Observed
Weapon Controls	15/15	
Hud Feedback	10/10	
Trajectory Preview	9/30	
Projectile Physics	15/15	
Explosion Gameplay	14/20	
Visual Audio Polish	5/5	
Stability Repeatability	5/5	

Key Findings

1. Trajectory Preview (9/30)	visible grenade aiming aid appears in grenade mode; aiming aid does not clearly communicate an arcing grenade throw; aiming aid did not update after aim or camera direction changed; consistency not credited because aiming aid did not update; aiming aid remains available in grenade mode and hides after leaving grenade mode
2. Explosion Gameplay (14/20)	default throw calibration borderline at 13.38 units: default throw calibration measured 13.38 units from GrenadeProjectile after 11.28 units of horizontal travel; default throw distance is outside the preferred 6-12 unit envelope but still usable; nearby target damage averaged across explosion trials: Seed 17031 throw raw nearby hit score 5/10; Seed 27059 throw raw nearby hit score 10/10; Seed 37087 throw raw nearby hit score 5/10; nearby damageable-only destructible damage averaged across explosion trials: Seed 17031 throw nearby damageable-only destructible was not damaged; Seed 27059 throw nearby damageable-only destructible was damaged; Seed 37087 throw nearby damageable-only destructible was not damaged; blast locality averaged across explosion trials: Seed 17031 throw explosion damage stayed localized; Seed 27059 throw explosion damage stayed localized; Seed 37087 throw explosion damage stayed localized; all explosion safety trials protected out-of-range targets; player safety averaged across explosion trials: Seed 17031 throw player safe; Seed 27059 throw player safe; Seed 37087 throw player safe; detonation effects averaged across explosion trials: Seed 17031 throw detonation produced runtime nodes or effects; Seed 27059 throw detonation produced runtime nodes or effects; Seed 37087 throw detonation produced runtime nodes or effects; borderline default throw distance receives 0/2 calibration-quality credit
3. Weapon Controls (15/15)	a weapon-switch input route also carries a controller binding; weapon mode observably switches through weapon_switch action; attack after weapon switch created runtime nodes; rapid grenade attacks appear rate-limited; default aimed attack still creates runtime nodes
4. Hud Feedback (10/10)	player has visible UI controls; UI control state changed after weapon switch; aiming changes UI feedback

5. Projectile Physics (15/15)	grenade attack spawned a nearby 3D node; spawned node follows arcing motion; projectile path stayed clear of player body
--------------------------------------	--

Detailed Item Analysis

Weapon Controls Detail (15/15)

Result	Check	Evidence
Earned 2/2	Controller weapon-switch binding	a weapon-switch input route also carries a controller binding
Earned 2/2	Weapon switch input responds	weapon mode observably switches through weapon_switch action
Earned 5/5	Grenade attack after switching	attack after weapon switch created runtime nodes
Earned 3/3	Rapid attack rate limit	rapid grenade attacks appear rate-limited
Earned 3/3	Default weapon still works	default aimed attack still creates runtime nodes

Hud Feedback Detail (10/10)

Result	Check	Evidence
Earned 3/3	Visible UI controls	player has visible UI controls
Earned 4/4	Weapon-switch UI state	UI control state changed after weapon switch
Earned 3/3	Aiming UI feedback	aiming changes UI feedback

Trajectory Preview Detail (9/30)

Result	Check	Evidence
Earned 5/5	Visible grenade aiming aid	visible grenade aiming aid appears in grenade mode
Missed 0/6	Communicates arcing throw	aiming aid does not clearly communicate an arcing grenade throw
Missed 0/8	Updates with aim/camera direction	aiming aid did not update after aim or camera direction changed
Missed 0/7	Preview matches projectile direction	consistency not credited because aiming aid did not update
Earned 4/4	Visibility lifecycle/cooldown behavior	aiming aid remains available in grenade mode and hides after leaving grenade mode

Projectile Physics Detail (15/15)

Result	Check	Evidence
Earned 4/4	Projectile spawned	grenade attack spawned a nearby 3D node
Earned 8/8	Arcing motion	spawned node follows arcing motion
Earned 3/3	Player-safe path	projectile path stayed clear of player body

Explosion Gameplay Detail (14/20)

Result	Check	Evidence
Partial 3/5	Nearby target damage across angles	default throw calibration borderline at 13.38 units: default throw calibration measured 13.38 units from GrenadeProjectile after 11.28 units of horizontal travel; default throw distance is outside the preferred 6-12 unit envelope but still usable; nearby target damage averaged across explosion trials: Seed 17031 throw raw nearby hit score 5/10; Seed 27059 throw raw nearby hit score 10/10; Seed 37087 throw raw nearby hit score 5/10
Partial 1/3	Nearby destructible damage across angles	nearby damageable-only destructible damage averaged across explosion trials: Seed 17031 throw nearby damageable-only destructible was not damaged; Seed 27059 throw nearby damageable-only destructible was damaged; Seed 37087 throw nearby damageable-only destructible was not damaged
Earned 5/5	Blast locality across angles	blast locality averaged across explosion trials: Seed 17031 throw explosion damage stayed localized; Seed 27059 throw explosion damage stayed localized; Seed 37087 throw explosion damage stayed localized; all explosion safety trials protected out-of-range targets
Earned 2/2	Player safety across angles	player safety averaged across explosion trials: Seed 17031 throw player safe; Seed 27059 throw player safe; Seed 37087 throw player safe
Earned 3/3	Detonation effects across angles	detonation effects averaged across explosion trials: Seed 17031 throw detonation produced runtime nodes or effects; Seed 27059 throw detonation produced runtime nodes or effects; Seed 37087 throw detonation produced runtime nodes or effects
Missed 0/2	Throw distance calibration quality	borderline default throw distance receives 0/2 calibration-quality credit

Visual Audio Polish Detail (5/5)

Result	Check	Evidence
Earned 2/2	Thrown grenade model	moving grenade projectile used a visible non-placeholder model
Earned 1/1	Visible effect nodes	visible grenade or explosion nodes appeared
Earned 1/1	Detonation audio	audio player was active during detonation window
Earned 1/1	Temporary node cleanup	some temporary nodes cleaned up

Stability Repeatability Detail (5/5)

Result	Check	Evidence
Earned 1/1	Repeated grenade attacks	two separated grenade attacks produced runtime behavior
Earned 1/1	Default attack after grenade use	default aimed attack still works after grenade use
Earned 1/1	Main scene loads	main scene loaded with a playable player
Earned 1/1	Main scene default attacks	main scene default shooting and melee both produced runtime behavior
Earned 1/1	Main scene actors and pickups	main scene kept targeteables, damageables, collect_coin, and damage-spawned pickup behavior
